Square Shank Center Drill Holder

The CANELA Center Drill Holder is a square shank tool holder that will allow you to get into the narrow space between the end of the part and the tailstock of your CNC lathe.

The Center Drill Holder's additional benefits:

- 1 - Is not limited to combined center/spotting drills alone, counter sinks, drills, and boring bars may be used.
- 2 - Frees up drill chucks and collet holders on your tool turret.
- 3 - Allows you to utilize unused turning tool pockets on your turret.
- 4 - Increases tooling arrangement flexibility.
- 5 - Can be used on manual and CNC lathes.

EINES CANELA, S.L.

TORRENT DE VALLMAJOR, 88 - 08915 BADALONA - CATALONIA - SPAIN - www.canelatools.com

1 SET = 1 Toolholder + 7 collets

Available in $\varnothing 20$ and $\varnothing 25$
